PROFESSIONAL SUMMARY

Software Developer with hands-on experience engineering scalable backend architectures using Java, Spring Boot, REST APIs, and SQL alongside React frontends. Proven algorithmic strategist with 700+ challenges resolved across LeetCode and HackerRank, dedicated to building high-performance engineering solutions.

SKILLS

- Languages:** Java, Python, JavaScript
- Frameworks:** HTML and CSS, Spring, Spring Boot
- Full-Stack:** Rest APIs, React
- Tools/Platforms:** MySQL, PostgreSQL, Git, GitHub Copilot
- Core Concepts:** OOPS, Collections, Multithreading, Agile Methodologies
- Soft Skills:** Leadership, Problem-Solving Skills, Team Player, Communication, Project Management, Adaptability

EDUCATION

- V.S.B. Engineering College** Remote
Bachelor of Technology - Artificial Intelligence and Data Science; CGPA: 8.30 October 2022 - May 2026

EXPERIENCE

- Software Development Trainee: ITC Infotech** Remote
Trainee Jan 2026 - Jun 2026
 - Trainee Overview:** Completed a structured Associate Software Development training program focused on full-stack application design and technical execution.
 - Technical Competencies:** Gained hands-on proficiency in Python, React, GitHub, Agile methodologies, Generative AI, and GitHub Copilot to implement engineering best practices through project-based learning.
- CodeAlpha** Remote
Backend Developer Intern Jun 2026 - Jul 2026
 - About:** Executed server-side engineering tasks focused on scalable architectures, RESTful APIs, and database management.
 - Project:** Built a URL Shortener with redirection, an Event Registration system with CRUD APIs, and a Restaurant Management system automating order and inventory workflows.
 - Tech Stack Used:** Python (Flask/Django), Node.js (Express.js), SQLite, PostgreSQL, MongoDB, Git.

PROJECTS

- Hospital Management Application:** Cut data latency by 10% and boosted responsiveness by engineering a scalable Spring Boot backend managing 10k+ records via optimized indexing and query execution.
Tech: Java, Spring Boot, SQL, REST APIs
Link: github.com/MounishRamesh/Hospital-Management-App
- URL Shortener Backend Service:** Increase lookup speeds by 40% and maximized redirection throughput through a scalable RESTful backend utilizing optimized schemas for collision-resistant coding of 4k+ mappings.
Tech: Node.js (Express.js) / Python (Flask), SQLite/MongoDB
Link: github.com/MounishRamesh/URL-Shortener
- Predictive Analysis System:** Elevated predictive precision to 94% and cut manual inspection operational overhead by 30% by developing multi-variable machine learning algorithms to evaluate site construction parameters.
Tech: Python, Machine Learning, HTML, CSS, JavaScript
Link: github.com/MounishRamesh/Predictive-Analysis-System

ACHIEVEMENTS

- Competitive Coding:**
Solved 700+ algorithmic problems across LeetCode and HackerRank, earning 6 profile badges.
- Hackathon Leadership:**
Led a multi-person engineering team in a competitive hackathon.
- Technical Presentation:**
Participated in a technical research paper presentation event hosted at CIT, Coimbatore.

CERTIFICATIONS

- Udemy Professional Certifications: SQL, Python, Java, JavaScript, and GitHub.
- Data Science Internship Certification by YBI Foundation.
- Milestone Badges: Earned 100 and 200 Days Problem Solving Badges on LeetCode.
- Consistency Award: Secured the LeetCode April Badge for continuous, daily problem-solving execution.
